PRACTICE ASSESSMENT

T UR

INSTRUCTIONS TO CANDIDATE:

1. A recent community health report indicates a growing concern about mental health issues among adolescents in Matini Community Health Unit. Reports from schools and local clinics suggest an increase in cases of anxiety, depression, and substance abuse among teenagers aged 13–19. Health officials from the local link facility believe that factors such as social media usage, family environment, peer pressure, and access to mental health services might be influencing adolescent mental well-being. As a researcher, you have decided to investigate this phenomenon.

You are required to perform the following tasks,

Task 1: Develop an informed consent form to aid in the collection of data among the study participants.

Task 2: Train on FIVE benefits of an informed consent form.

2. You have been provided with the following resources for the practical tasks:

- Foolscape
- Table
- Chair
- Simulated Audience
- White Board Marker Pen
- White Board/flipcharts
- Eraser
